Nationwide public-plan discovery

Dated operational inventory and separate earlier public-search snapshot · 22 October 2026

Operational document collection: 22 October 2026

Our working collection links planning documents to 254 Tribal profiles. Verification and national searches are continuing. Data as of 2026-10-22T12:20:10.158087+00:00. This is an incomplete operational inventory, separate from the earlier CATF public-search snapshot retained later in this report.

The collection increased from 251 to 254 profiles after adding three reviewed relationships. It holds 234 byte-distinct files, 306 distinct profile/file pairs and 404 lead records. These are storage and receipt measures, not verified counts of climate plans or current editions.

20 file hashes have placements under multiple profiles. This storage metric does not establish shared planning participation. A PDF bundle may contain multiple substantive plans; do not count its parent container and components twice. An embedded GHG inventory is not automatically a separate plan.

The operational roster preserves 577 identities; the dated CATF cohort has 575 governments. Their ID crosswalk is unresolved. No per-Nation joins or national prevalence fraction are supported. Unmatched identities and profiles without documents remain unknown; they do not establish absence of planning.

Two inherited files remain format-unvalidated: the Solomon PCAP is encrypted, and a file labeled Climate Vulnerability Assessment is unsupported/corrupt under the validator. Format validation counts: unvalidated application/json: 1; unvalidated application/pdf: 1; validated application/pdf: 232. Format validation alone does not verify substantive plan eligibility.

Six observed receipt labels: overlapping provisional counts

Retain all six observed labels. Both columns overlap and must not be summed. File hashes are neither semantic plan counts nor edition-family counts. These provisional receipt labels do not establish reviewed national planning prevalence.

Observed receipt label	Distinct file hashes	Profiles with this receipt label
Climate action	56	78
Climate adaptation	40	58
Hazard mitigation	84	82
Vulnerability assessment	24	24
GHG reduction	17	33
Pollution reduction	18	23

Three reviewed relationships: a bounded subset

Only this subset has 3 broad eligible relationships, 2 climate-specific and 2 action/adaptation relationships. All 3 are included in broader plans; 0 are standalone single-Tribe plans. The additions are not a representative sample of the operational inventory.

2 relationships have documented federal program support and 1 has unknown federal support. Adoption, current edition and internal Tribal resources remain unknown for all three. Unknown support is not zero support. Agency hosting alone is not funding proof; program support does not establish a direct Tribal award, an award amount or an unspent balance.

Whole-inventory funding, climate-specific eligibility and single-Tribe/shared-plan totals remain unavailable. A funding opportunity, award and completed plan are distinct. The source review is not independent human validation.

Naknek Native Village: reviewed broader-plan relationship

Bristol Bay Region COMPREHENSIVE CLIMATE ACTION PLAN. Acknowledgements participant-community/Tribe list explicitly pairs Naknek with Naknek Native Village; South Naknek appears separately. Naknek standalone authorship and adoption are not inferred.

Eligibility: broad: accepted; climate specific: accepted; action adaptation: accepted. Identity is unreconciled; no CATF canonical Nation ID has been assigned.

Federal support: documented program support. EPA Climate Pollution Reduction Grants support; Bristol Bay Native Association is the recipient. This does not establish a direct Tribal award, award amount or unspent balance. Program: Climate Pollution Reduction Grants; recipient: Bristol Bay Native Association; subawardee: Unavailable. Award ID: Unavailable; award amount: Unavailable.

Dates: publication year 2025; publication date Unavailable; cover date Unavailable; completion date 2025-09. Body states completed September 2025 (physical PDF page 5); this controls over the filename date. Publication day, adoption and current edition are unknown. Adoption: unknown; current edition: unknown.

One held plan edition and byte object; new Naknek relationship only. Embedded inventory is not a second document. Internal Tribal resources: unknown.

Named participant in a broader regional plan; standalone Tribal authorship or adoption is not established.

Bristol Bay Region COMPREHENSIVE CLIMATE ACTION PLAN; physical PDF pages 2, 5, 39; object SHA-256 0a4e72738fd295e4b030e5ee221264e023daacfbd23fb70fd6f034f08af2f1de.

Native Village of Ambler: reviewed broader-plan relationship

Priority Climate Action Plan Northwest Arctic Borough, Alaska. Northwest Arctic Borough explicitly represents eleven Tribal communities under the TCC planning-grant award; Ambler is named. This establishes represented scope, not independently verified Ambler attendance, direct planning participation, authorization or adoption.

Eligibility: broad: accepted; climate specific: accepted; action adaptation: accepted. Identity is unreconciled; no CATF canonical Nation ID has been assigned.

Federal support: documented program support. EPA Climate Pollution Reduction Grants support; Tanana Chiefs Conference is the recipient. Northwest Arctic Borough is the subawardee. This does not establish a direct Tribal award, award amount or unspent balance. Program: Climate Pollution Reduction Grants; recipient: Tanana Chiefs Conference; subawardee: Northwest Arctic Borough. Award ID: Unavailable; award amount: Unavailable.

Dates: publication year 2024; publication date Unavailable; cover date 2024-03-01; completion date Unavailable. Component cover is dated March 1, 2024 (physical PDF page 1075). Final, adopted and current status are unknown. Adoption: unknown; current edition: unknown.

Ambler links to NWAB embedded plan component, not an independent TCC-authored Ambler plan. One held byte object; do not separately count embedded inventory or inflate parent plus component. Internal Tribal resources: unknown.

Represented community scope does not establish attendance, direct participation, authorization or adoption.

NWAB component occupies physical PDF pages 1075–1130 within the TCC bundle. Count the component once; do not add the parent container or embedded inventory as separate plans.

Priority Climate Action Plan Northwest Arctic Borough, Alaska; physical PDF pages 1075, 1082, 1089, 1092, 1102, 1130; object SHA-256 a1abf0bb6a21e740652b184a42d34a3028998ca3c7af4b13bf63ea11712a0a6d.

Yocha Dehe Wintun Nation, California: reviewed broader-plan relationship

Yolo County Operational Area Multi-Jurisdictional Hazard Mitigation Plan. Named jurisdiction and planning representatives; specified hazard actions include the Nation.

Eligibility: broad: accepted; climate specific: withheld unresolved; action adaptation: excluded for this record. Identity is unreconciled; no CATF canonical Nation ID has been assigned.

Federal support: unknown. Federal support is unknown, not zero. Public hosting alone is not funding evidence. Program: Unavailable; recipient: Unavailable; subawardee: Unavailable. Award ID: Unavailable; award amount: Unavailable.

Dates: publication year 2012; publication date Unavailable; cover date Unavailable; completion date Unavailable. Plan is labeled December 2012 Final. Formal adoption and current edition are unknown; the URL's 2018 directory is not the publication date. Adoption: unknown; current edition: unknown.

One shared HMP edition; no separate Tribal annex admitted. Internal Tribal resources: unknown.

County GHG inventory explicitly excludes the Tribe (physical PDF page 109); Tribal climate-specific coverage remains withheld and unresolved.

One broader hazard mitigation plan edition; no separate Tribal annex admitted.

Yolo County Operational Area Multi-Jurisdictional Hazard Mitigation Plan; physical PDF pages 7, 12, 13, 109, 119, 121; object SHA-256 b1741b176148969d1d4cb1f28dbab323ad94dacaf8e015eca66a5df1fc26450a.

Operational inventory provenance and downloads

Type labels are overlapping provisional scout metadata, not reviewed plan prevalence.

A byte object may contain several plans; file totals are not semantic plan totals.

Multiple-profile byte placement does not itself verify shared planning participation.

Three reviewed relationships are a bounded subset, not a representative sample.

EPA CPRG support is not a direct Tribal award, award amount or unspent balance.

Do not use 254/575 or infer absence for profiles without stored documents.

Verification and national searches are continuing. The first ten profiles were assigned, not completed; initial direct-web shards are partial and add no admissions.

Uncaptured metadata, malformed original search records and access gaps remain unresolved. These are not absence evidence.

Funding, partner, edition and whole-inventory relationship checks remain unfinished. Internal Tribal resources are unknown for all three reviewed relationships.

Two inherited files remain format-unvalidated; inventory presence does not establish a readable or reviewed plan.

Frozen metrics SHA-256: efa13418340f740a62f6f95f11487e65244492fffc26c0a482e6f6d3266feb1b. Source-manifest SHA-256: cad2597208ab9671e329035dcef4213f5ca35b72a2d38a9f75e9c400260510a9.

Dated operational inventory and reviewed relationships (JSON); three reviewed relationships with citations (CSV). Blank award fields in the CSV mean unknown, not zero. These records do not replace or join the earlier candidate/search files.

Earlier bounded public search: dated snapshot

The following search outcomes, candidate URLs and recency bins preserve the earlier CATF metadata sweep. They are a separate dated snapshot from the operational document inventory above. The later inventory does not update these outcomes or the frozen risk-based follow-up queue.

Public discovery does not establish that a Tribe lacks a plan. These records describe a bounded public search, not a national census of planning held by Tribes. No full document harvest, private records or Traditional Ecological Knowledge were collected.

Baseline: 575 Nations, 23 assignments, three distinct document classes each. As of 2026-10-21, 575 Nations have all three search attempts recorded; 575 have all three completed without a blocked class. Completed batches: 23 / 23.

379 raw candidate records consolidate to 335 exact source URLs; 224 Nations have at least one candidate. **0 reviewed unique editions** are distinguished from search-result candidates. 240 candidate URLs have unknown date age.

Category outcomes: found: 323; no matching public document located: 1402.

Earlier candidate URLs by evidenced recency

Year difference from 2026-10-21; adoption year first, then explicitly evidenced update year, then publication year. Retrieval dates and URL filenames never supply age. Unknown remains separate.

Exact canonical document URL, or landing URL if no document link; fragments removed. Mirrors, plan families and editions may remain unresolved. One URL may count in multiple classes.

Counts are candidate URLs, not confirmed editions. A source can occur in more than one class; do not add class totals into an edition count.

Class	Candidate URLs	0–5 years	6–10 years	Over 10	Unknown
Climate adaptation / action	135	22	10	5	98
Climate vulnerability	63	3	9	2	49
Hazard mitigation / management	144	25	17	5	97

Earlier search methods, roster and interpretation

Three separate focused class searches per Nation, plus bounded follow-up when useful. Completed no-match outcomes describe only this search budget. Blocked attempts remain unresolved.

Exact canonical document URL, or landing URL if no document link; fragments removed. Mirrors, plan families and editions may remain unresolved. One URL may count in multiple classes.

Year difference from 2026-10-21; adoption year first, then explicitly evidenced update year, then publication year. Retrieval dates and URL filenames never supply age. Unknown remains separate.

catf-scanner-regions-1: seven scanner geographic state groups plus California and Other. Assign each Nation once by first recorded registry state; counties once by state. This is a presentation grouping, not BIA/NCAI/ATNI jurisdiction.

Evaluated CPRI physical percentile >=80, all three searches complete, and no matching public source located in the listed class. This identifies research/outreach work, not absent planning or capacity.

Pinned 575-Nation baseline; all names or retained aliases present in January 2026 federal notice. Exact-name reconciliation is retained separately.

Search-result candidates are not reviewed plan editions. Reviewed edition count requires explicit document/title/relationship/date review; complete content assessment is out of scope.

Public discovery does not establish that a Tribe lacks a plan.

No full document harvest; source links can redirect, move or restrict access.

Candidate classification and participation evidence require confirmation before a planning census or import.

Unknown dates, unresolved editions and inaccessible sources remain visible.

Risk screening is cohort-relative, development-stage and limited by hazard coverage.

Roster SHA-256: 5db8f52cf44d3a3853f8403cd6dc845a59088f07f42b40a3488575b5cbe7cece. Batch manifest SHA-256: caef20575e9a30a75513bdc498dd5d4bb7bd5440202e1ca432c875c3dc99d994. Individual source URLs appear below and in plan-candidates.csv. Full query receipts remain in the working record.

Earlier Nation-by-class search outcomes

No public match located means none qualified within the recorded budget. Blocked, partial and unsearched classes remain unresolved. A candidate in one class does not complete another class.

113 Nations meet the defined risk-and-public-search follow-up rule for at least one class. A blank flag is not a finding of low risk or adequate planning. Codes in the final column: CAP = adaptation/action; CVA = vulnerability; HMP = hazard plan.

Earlier located public source index

The linked title opens the canonical landing page or document. Relationships can be Nation-authored, regional participation or other explicitly supported coverage. Mere mentions were not sufficient. Dates without explicit evidence remain unknown. Rights are not transferred by discovery; consult source terms before reuse.

Public document metadata, access conditions and supported Nation relationships are retained in the earlier candidate CSV, the earlier search-outcome CSV and plans.json. These frozen files are unchanged by the operational inventory update. Full query receipts and raw internal review details remain in the local working record. The metadata sidecar is not claimed to be a validated native plan-assessor import.

The County received one official comment letter from the Big Pine Paiute Tribe of the Owens Valley. Many of the comments identified concerns regarding the natural resources of the County and aspects of the hazards analysis that could be clarified to address County needs and concerns. Based on a number of their comments, the County felt it was important to conduct face to face meetings with this Tribe, as well as the other Tribes in the County, to ensure a common understanding of the hazard mitigation planning process and what this Plan intends to accomplish. On September 1, 2016, County staff (Diane Fortney and Kelley Williams) and the County's consultant (Aaron Pfannenstiel) sat down with members of the Inyo County Board of Supervisors (by district) and individual Tribal representatives (within the Board represented district) to discuss the Plan, answer questions about the process, and identify ways to collaborate in the future on hazard mitigation activities within the County. The following tribal personnel attended these meetings:	Lone Pine Paiute-Shoshone Tribe Search excerpt identifies Lone Pine Paiute-Shoshone Tribe in a climate-related record.	Hazard mitigation / management	Unknown initial search result only
This Priority Climate Action Plan is submitted on behalf of the Poarch Band of Creek Indians (hereafter referred to as "The Tribe"), a recognized federally recognized Tribe of Native Americans with reservation lands in lower Alabama. This PCAP is a narrative report that provides an overview of the Tribe's significant greenhouse gas sources, and establishes near-term greenhouse gas emission reduction goals, and provides strategies and identifies measures that address the highest priority areas to help the Tribe to meet these goals.	Poarch Band of Creek Indians Search excerpt identifies Poarch Band of Creek Indians in a climate-related record.	Climate adaptation / action	Unknown initial search result only
